

## Corporate Social Responsibility Politic of Volkswagen Motor Polska

The company conducts its business based on group essentials and Code of Conduct. Consciously and responsibly shapes economic relations, which results in a concern for safety and the highest quality of its products. Volkswagen Motor Polska is looking for innovative solutions and strives to expand the product range in order to secure jobs, build trust and customer satisfaction.

The activities of corporate social responsibility at Volkswagen Motor Polska are mainly addressed to employees to whom the company provides decent working conditions and remuneration, health protection, development and safety. The company being awarded the title of "Employee Friendly Employer" twice by the President of the Republic of Poland confirms the company's efforts.

Another priority is to ensure good relations with all stakeholders, i.e. customers, suppliers, local authorities, neighbours and the local community. Volkswagen Motor Polska cooperates with social partners and supports employee volunteering, whose beneficiaries are local institutions.

The third, equally important as the previous ones, due to the corporate social responsibility is the protection of the environment and the sustainable use of its resources, as exemplified by the planting of a forest, cleaning green areas, as well as the continuous improvement of environmental awareness. The company plans and implements investments taking into account the principles of sustainable development.
